SUMMARY

Computer Engineering student with hands-on experience in full-stack development, AI-powered applications, and software engineering. Proficient in React.js, FastAPI, MongoDB, MySQL, and REST API development, with a strong foundation in data structures, algorithms, and problem-solving. Passionate about building scalable, user-centric solutions and applying technology to solve real-world challenges.

EDUCATION

B.Tech degree in Computer Engineering (Currently Pursuing)

Shah and Anchor Kutchhi Engineering College

CGPA : 9.8

SKILLS

Python	TailWind CSS	HTML	Canva
C / CPP	Java	UI/UX	Figma
ReactJS	Flutter / React Native	GFX Designing	Alight Motion

PROFESSIONAL EXPERIENCE

Product & RnD Engineer (TBI - SAKEC)

Nov 25-Mar 26

- Built and optimized a thermoelectric cooling product from concept to prototype
- Managed design iterations, component selection, and testing workflows
- Secured ₹25,000 grant and contributed to competition wins
- Coordinated with industry partner Corzest and explored commercialization opportunities

Jr. Flutter Developer Intern (RootNova Technologies Pvt. Ltd)

June 26 - Current

- Developing a Flutter-based women's health app for period cycle tracking and virtual consultations.
- Integrated secure payment functionality for in-app transactions.
- Implemented real-time video call integration for consultation features.
- Contributing to UI development, debugging, testing, and overall app performance.

PROJECTS

AIRA

- Developed a thermoelectric cooling and air purification system
- Collaborated in a multidisciplinary team for design and prototyping
- Secured ₹25,000 grant and won multiple competitions
- Partnered with industry (Corzest) and engaged with investors for commercialization

SiteOps – Smart Construction Site Management System | Python, FastAPI, Flutter, Face Recognition, Geofencing APIs

- Developed a construction-site management platform with 2 role-based portals for workers and contractors, centralizing attendance, payroll, inventory, and workforce operations.
- Engineered a 3-layer anti-proxy attendance system using GPS geofencing, device binding, and facial recognition.
- Automated check-in/check-out through 30-second location validation and auto-checkout after 10 minutes outside the site boundary.
- Built a contractor dashboard supporting 5+ operational workflows, including workforce monitoring, wage calculation, trust scoring, inventory tracking, and alerts.

ClauseWise – AI-Powered Contract Risk Analysis Platform | React.js, Tailwind CSS, Flask, BERT, NLP, GROQ API, Self-Healing RAG

- Developed a BERT-based legal contract analysis platform with 3-level risk classification—Safe, Caution, and Unsafe—and automated overall risk scoring.
- Built an end-to-end PDF analysis pipeline supporting clause extraction, side-by-side review, risk highlighting, and simplified legal explanations.
- Engineered a Self-Healing RAG chatbot for context-aware, document-grounded legal assistance and intelligent retrieval recovery.
- Integrated 5+ analysis features, including clause-wise explanations, automated reports, downloadable summaries, and India-specific legal insights.
- Designed a privacy-focused, zero-login workflow for immediate and accessible contract analysis.
