SUMMARY

Engineering student with a strong interest in technology, product development, and creative design. Passionate about building real-world solutions through coding, web development, and innovative projects. Experienced in developing applications like ERP systems and cybersecurity tools, with a focus on problem-solving and execution. Skilled in UI/UX, teamwork, and delivering impactful, user-focused outcomes.

PROFESSIONAL EXPERIENCE

Social Media Coordinator (Placement Assistance Committee SAKEC) Nov 24- Current

- Coordinated 20+ placement drives involving 200+ students, ensuring seamless scheduling, communication, and execution between students and recruiters
- Ensured smooth end-to-end execution of placement activities with minimal scheduling conflicts

Social Media Head IUCEE SAKEC, TLC, IIC & GEC Nov 24-26

- Organized academic and technical sessions across multiple domains, ensuring smooth execution and participation along with Uni Fairs and Competitions.
- Coordinated with speakers, faculty, and student teams for seamless event planning
- Managed planning, scheduling, and documentation of activities efficiently

Product & RnD Engineer (TBI - SAKEC) Nov 25-Mar 26

- Built and optimized a thermoelectric cooling product from concept to prototype
- Managed design iterations, component selection, and testing workflows
- Secured ₹25,000 grant and contributed to competition wins
- Coordinated with industry partner Corzest and explored commercialization opportunities

PROJECTS

AIRA

- Developed a thermoelectric cooling and air purification system
- Collaborated in a multidisciplinary team for design and prototyping
- Secured ₹25,000 grant and won multiple competitions
- Partnered with industry (Corzest) and engaged with investors for commercialization

SiteOps – Smart Construction Site Management System | Python, FastAPI, Flutter, Face Recognition, Geofencing APIs

- Developed a secure construction site management platform with Worker and Contractor roles to streamline attendance and operations.
- Implemented a 3-step verification system using geofencing, device binding, and face recognition to prevent fake attendance.
- Integrated automated check-in/check-out with transparent real-time wage tracking.
- Built a contractor dashboard for workforce monitoring, trust scoring, and site inventory management

ClauseWise – AI-Powered Contract Risk Analysis Platform | React.js, Tailwind CSS, Flask, BERT, NLP, GROQ API, Self-Healing RAG

- Developed a user-friendly web platform to analyze legal contracts and identify risky clauses using a BERT-based NLP pipeline.
- Implemented clause-wise classification with risk levels (Safe, Caution, Unsafe) and an overall risk score for quick decision-making.
- Integrated PDF parsing, side-by-side analysis, and simplified English translation to make complex legal terms easily understandable.
- Built an AI chatbot powered by a Self-Healing RAG architecture for context-aware legal assistance and intelligent query handling.
- Developed features like clause-wise explanations, automated report generation, and downloadable analysis reports for enhanced user guidance.
- Designed a lightweight, privacy-focused system with no-login access and India-specific legal insights for wider accessibility.

SKILLS

Python	MongoDB	Canva	TailWind CSS	Web Scrapping	Leadership
UI/UX	C / CPP	Figma	ReactJS	GFX Designing	Communication Skills
HTML	Java	Alight Motion	Flutter / React Native	LLM Integration	Event & Logistics Management

EDUCATION

B.Tech degree in Computer Engineering (Currently Pursuing)

Shah and Anchor Kutchhi Engineering College
